

ABI TURNER

PROFESSIONAL SUMMARY

A graduate from the Command Shift coding bootcamp seeking a career change into Software Development. A strong enthusiasm and ability to learn new technologies at pace and a desire to utilise and expand skills as a developer. Proven prioritisation and communication skills with over six years experience in a retail leadership role.

EXPERIENCE

Full Stack Developer Student, 10/2022 - 05/2023 Command Shift

- Studied full-stack development using JavaScript and React to create front-end applications integrated to the back-end with API's. Worked with Express.js and PostgreSQL for back-end CRUD operations. Implemented test-driven development throughout each project using testing frameworks such as Jest and Mocha.
- Learned industry best practices and communicated with tutors and students through stand-ups, retrospectives and code reviews.
- Collaborated with students on group projects through mob and pair programming.

Store Manager, 07/2017 - Current Sainsburys, West Yorkshire

- Accountable the performance of both single and dual site convenience stores with an annual turnover of up to £4.3million
- Analysing data to identify trends and drive efficiency across locations to deliver key performance measures.
- Exercising strong leadership skills to deliver business change at pace across site teams.
- Effective time management and resource planning between multisite locations
- Responsible for individual store KPIs and risk management in store.
- Championing diversity and inclusion across the West Yorkshire region including leading the Mentoring Women in Leadership program.

Retail Manager, 07/2014 - 07/2017 Sainsburys, West Yorkshire

- Various retail management positions

GitHub
Debugging
REST APIs
Agile Software Methodologies

PROJECTS

Pawfect Match

📺 Web application made using React with an integrated API, Firebase Authentication and Firestore for users to create an account, find and save personalised recommendations for dog breeds.

Surreal Estate

📺 Web application made using React linked to MongoDB where properties can be added, updated, and deleted.

Weather App

📺 Weather forecasting app built with React that uses live data from an API to display a five-day forecast for a selected location.
